📍 Dakahlia Governorate, Nabaroh City 🔗 [linkedin.com/in/mohamed-el-sayed-al-ajmi](https://www.linkedin.com/in/mohamed-el-sayed-al-ajmi)

Profile

Computer Science student with strong analytical and problem-solving skills. Skilled in evaluating technical information, conducting research, and communicating findings clearly. Interested in Artificial Intelligence, chatbot evaluation, and quality assurance. Skilled in identifying logical inconsistencies, analyzing responses, and providing structured feedback. Strong attention to detail and ability to work independently in remote environments.

Education

B.Sc. in Computer Science

Future Academy 🌐

09/2024 – Present

Cairo, Egypt

Current Status: Second Year Student.

Relevant Coursework:

- Programming & Data: Object-Oriented Programming (OOP), Data Structures, Structured Programming, Database Management Systems (SQL).
- Systems & Hardware: Logic Design, Electronics, CS Fundamentals, Introduction to Information Systems.
- Mathematics & Analysis: Discrete Mathematics, Probability & Statistics, Linear Algebra, Calculus.

Skills

Programming Languages

- C++
- SQL
- Python
- ChatGPT
- Google Workspace
- Microsoft Office

Hardware & Embedded Systems

Arduino, Logic Design, Circuit Analysis

AI & Analytical Skills

- AI Chatbot Evaluation
- Response Quality Assessment
- Content Evaluation
- Research and Fact Verification
- Critical Thinking
- Attention to Detail
- Technical Documentation
- Independent Work

Computer Science Concepts

- Data Structures
- Algorithms
- Object-Oriented Programming (OOP)
- Database Management Systems
- Software Engineering Fundamentals
- System Analysis & Design
- Computer Networks
- Computer Architecture

Soft Skills

- Critical Thinking
- Attention to Detail
- Problem Solving
- Technical Writing
- Teamwork
- Independent Work

Languages

Arabic – Native

English – B2 Upper-Intermediate

Projects

2: Wi-Fi Controlled Smart Car

02/2025 – 05/2025

IoT & Robotics

Developed a smart robotic vehicle controllable via **Wi-Fi** using a custom web interface hosted on a local IP. Implemented obstacle avoidance algorithms using ultrasonic sensors to halt movement automatically when obstructions are detected. Utilized C/C++ for microcontroller programming and hardware interfacing.

1: Autonomous Fire-Fighting Robot

09/2025 – 11/2025

Embedded Systems & Safety

Designed and built an automated safety robot capable of **360-degree** environmental monitoring. Integrated flame and temperature sensors to detect fire hazards instantly. Programmed the system using **C++** and **Arduino** to trigger an alarm and automatically direct water pumps toward the fire source upon detection.
